## Skills

### Teaching

### Java

### Python

### C

### JavaScript

### C++

### HTML

### Angular Framework

### Office 365

### Fusion 360

### Godot & GDScript

### Visual Studio Code

## Summary

Motivated software engineering student looking to break into a career of professional software development.

## Work experience

Jun - Aug 2024 **Instructor Intern**  
Lavner Education

Practiced the technical skills I have learned by explaining them to kids and seeing them use those same skills for the first time. Includes programs like Scratch, TinkerCAD, GDevelop, Cura, Sphero, Minecraft, and Roblox.

Dec 2022 - Jun 2023 **IT Intern**  
Van Cleef Engineering Associates

Created a standardized naming system for documents that increased the productivity of our data entry team. Worked with IT technicians and fellow interns to set up various hardware systems. This includes imaging computers for deployment and physically setting up workstations.

Jun-Aug - 2022 & 2023 **IT Intern**  
Mercer County Technical Schools

Spent these summers working with the school's IT technician and gained valuable experience and knowledge of computer systems.

## Education

Aug 2023 - Jun 2027 **Rochester Institute of Technology**  
Software Engineer

Currently pursuing a BS in Software Engineering with minors in both Mathematics and Computer Engineering. I'm looking forward to co-ops and pre-accepted into the MS program.

Sep 2020 - Jun 2023 **Mercer County Community College**  
Dual-Enrollment

Enrolled in college courses while in high school to get a head start on credits. I went on to graduate high school with 54 college credits.

## Volunteer

April 2021 - Present **Minecraft Education Program**  
National Junior Tennis League of Trenton

Worked with the director to change the curriculum to be more technically inclined. Teaching elementary age children moral values and technical skills through projects done within Minecraft: Education Edition. Great booster of my cooperative and communication skills.
